

**New Jersey Turnpike Authority
Operations Department**

**Order for Professional Services No. A4260
Operations and Maintenance of Water and Wastewater Systems and
On-Call Design and Construction Management Services for Water and Wastewater Systems
Response to Inquiries
Request for Expressions of Interest**

1. Inquiry:

There seems to be an inconsistency in the multiplier cited on pages 22 and 25 of the RFEOI.

On page 22, is it the Authority's desire to lower the multiplier for Maintenance of Water and Wastewater Systems (which is not a Construction Inspection Activity) to 2.35 or to maintain the maximum overhead rate for these services at 127.3% (which calculates to a 2.50 multiplier)?

On page 25, the multiplier for Construction Inspection Services is cited as 2.35, however, that would correspond to a maximum overhead rate of 113.6%.

Please clarify if the Maintenance and Operations Services is being classified as Construction Inspection Service as the office/overhead related amenities typically provided for by the NJTA under Construction Contracts are not available in this OPS.

Response:

For the Maintenance of Water and Wastewater Systems, the multiplier cap is 2.35 (overhead rate of 113.64%). The percentage has been corrected.

For Construction Inspection Services, the multiplier cap is 2.35 (overhead rate of 113.64%). The percentage has been corrected.
